SCIENCE GRD III**

NAME:.....DATE:..... CLASS.....

TIME: 1:00HOURS

INSTRUCTIONS

- This paper consists of section A and B with a total of five(5) questions
- Answer all questions
- Answers must be written in the spaces provided
- Cellular phone and all materials concerning with this subject are not allowed in the examination room.
- Remember to write your name, stream and date.

SECTION A

1. Choose a letter of the correct answer from the choices given then write in the box provided.

i) Which of the following are security animals

- | | |
|-----------------------|----------------------|
| a) Donkeys and camels | c) Lion and hyenas |
| b) Dogs and cats | d) Guards and police |

ii) Which of the following is a source of most forms of energy on earth.

- | | |
|---------------------|-------------------------|
| a) Kinetic energy | c) Solar energy |
| b) Potential energy | d) Gravitational energy |

iii) Reflected sound is called

- | | |
|----------|----------|
| a) Music | c) Echo |
| b) Noise | d) Sound |

iv) Energy stored by an object due to its position is called

- | | |
|-------------------------|---------------------|
| a) Thermodynamic energy | c) Kinetic energy |
| b) Mechanical energy | d) Potential energy |

v) How do living organism increase in number

- | | |
|--------------------|-----------------|
| a) By reproduction | c) By breathing |
| b) By growing | d) By movement |

2. Matching the question in **LIST A** with the answer in **LIST B** write the letter of the

SN	LIST A	ANSWERS	LIST B
i)	Mosquito	()	A. Living and non living
ii)	Eggs, fish and beans	()	B. Live on land and water
iii)	Plant and animal	()	C. Body building food
iv)	Frogs	()	D. Living things
v)	Environment	()	E. Spread malaria
			F. It gives energy
			G. Move by crawling

3. Fill in the blanks by using the words in the box

Vacuum, habital, mechanical energy, excretion, sound, potential energy

- i) A process of all living thing to remove unwanted material from the body is known as
- ii) A form of energy which is produced when an object is made to vibrate is called
- iii) The sum of both kinetic and potential energy possessed by an object is called
- iv) A natural environment in which an animal or plants live is called
- v) A place where sound do not pass through is called

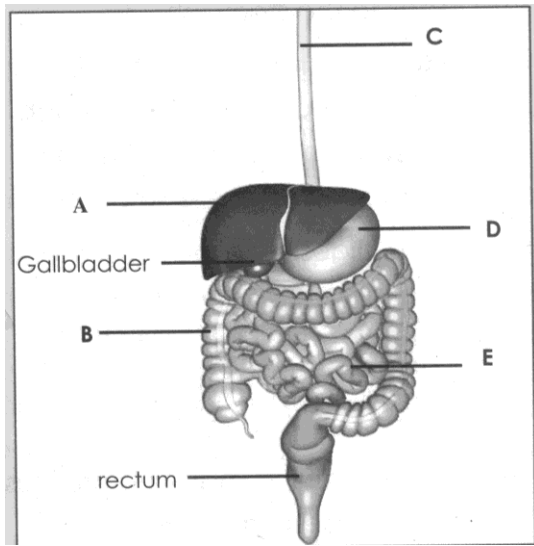

4. Read the following passage and answer the question that follow

Sound is a form of energy produced by vibration. Vibration are produced by both natural and artificial sources. A vibration is a to and fro motion which is continually repeated. Sound can be produced by natural sources such as animals e.g cow and goats. Sound can also be produced by artificial sources such as guiter, drum etc.

Questions

- i) A form of energy produced by vibration is
- ii) Two sources of sound are natural source of sound and
- iii) To and fro motion which is continually repeated is called
- iv) Natural source of sound comes from animals such asand
- v) Sound waves can not travel through.....

5. Observe the following diagram

- i) Gullet is shown by letter
- ii) The small intestine is shown by letter
- iii) The stomach is shown by letter
- iv) The large intestine is shown by letter
- v) What organ is shown by letter A
