HOLIDAY PACKAGE MAY, - 2019
GEOGRAPHY GRD VI

NAME: _____ STREAM _____ DATE: _____

INSTRUCTIONS

1. This paper consists of four sections A,B,C and D of fifty (50) questions
2. Answer all questions in all sections
3. Good and neat handwriting will make you get the right marks

SECTIONS A: MULTIPLE CHOICE

Choose the correct answer and write its letter in the answer sheet provided

1. A drawing representing of all or part of the earth's surface on a flat sheet of paper is called _____
(a) An art-work (c) A map ()
(b) A scale (d) A picture ()
2. Which of the following groups consists of types of map scales _____
(a) Statement, representative fraction and linear (c) Ground, medium and representative fraction ()
(b) Small, medium and large (d) Large, medium and statement. ()
3. The two main uses of a map scale are _____
(a) Topography and statistics (c) Drawing of systematic diagrams and measurements on maps ()
(b) Showing direction and indicating boundary on the maps (d) Colouring and interpreting of maps ()
4. Which of the following consists of the forms of expressing the scale of a map _____ ()
(a) Small, medium and large (c) Topographic, statement and representative fraction ()
(b) Statement, representative fraction (RF) and linear (d) Statement, large and small
5. Which of the following scale is most suitable for drawing a map of the African continent? _____ ()
(a) 1:1,000 (c) 1:50,000
(b) 1:500,000 (d) 1:10,000
6. Usually a small scale is used when a map is drawn to represent _____ ()
(a) A small area with a few details (c) A large surface area of land with a few details
(b) A large area of land with many details (d) A small area with many details ()

7. Standard six pupils were told or assigned to draw a map of their classroom. What type of a scale will be suitable for their map? _____ ()
 (a) Linear scale (c) Small scale
 (b) Medium scale (d) Large scale
8. The representative fraction scale of a map is 1:25,000. Which one of the following best expresses the same scale in a statement scale? _____ ()
 (a) 1cm represents 25 kilometres (c) 1 unit represents 25,000 units
 (b) 1m represents 25, 000 cm (d) 1km represents 25,000 cm
9. 13cm were measured between two towns on a map. If the scale of a map was 1:250,000, what is the actual distance between the two towns? _____ ()
 (a) 3250km (c) 32.5km
 (b) 325km (d) 0.325km
10. Which of the following is not a proper way of writing a scale of a map? _____ ()
 (a) 1:100,000 (c) 1cm to 2km
 (b) 1cm represents 1km (d) 1cm = 100,000cm
11. Imaginary lines that are drawn horizontally and vertically on maps to locate the position of places are called _____ ()
 (a) Contour lines (c) Vertical lines
 (b) Latitudes and longitudes (d) Horizontal lines
12. The earth's imaginary lines which run from north pole to South pole are called _____ ()
 (a) Axis (c) Latitudes
 (b) Equator (d) Longitudes
13. The lines which are used to calculate the time of different places presented on a map are _____ ()
 (a) Longitudes (c) Latitudes and longitudes
 (b) Latitudes (d) Equator
14. The main latitude with zero (0°) degrees is an _____ ()
 (a) Prime meridian (c) Equator
 (b) Greenwich meridian (d) Tropic latitude
15. If a place is found along a latitude 60°s, this means a place is _____ ()
 (a) 60° North of the equator (c) 60° West of the equator
 (b) 60° East of the equator (d) 60° South of the equator
16. A continuous, directed movement of ocean water generated by the forces acting upon the water is called _____ ()
 (a) Air pressure (c) Low pressure
 (b) Ocean current (d) Equatorial rainfall

17. The amount of moisture in the air is called _____ ()
 (a) Dew (c) Water
 (b) Air (d) Humidity
18. The instrument that records the intensity of sunshine that is received on the earth's surface at a certain period of a day is called _____ ()
 (a) A thermometer (c) A sunshine recorder
 (b) A rain gauge (d) A windvane
19. Which of the following is not a rift valley lake? _____ ()
 (a) Lake Tanganyika (c) Lake Turkana
 (b) Lake Albert (d) Lake Kyoga
20. The woodland vegetation which is common in central Tanzania is called ____woodland ()
 (a) Baobab (c) Thicket
 (b) Mangrove (d) Miombo

SECTION B: FILLING QUESTIONS

Fill in the correct geographical terms or words to the following questions

21. The increase in the average temperature of the earth is called _____
22. Latitudes are sometimes referred to as parallels because they run parallel to the _____
23. One of the positive effects of disasters such as volcanic eruption and floods is _____
24. The imaginary lines that run vertically on a map are called _____
25. A process in which water vapour changes into liquid is called _____
26. A clear, tasteless, colourless liquid substance which can be found in gaseous and solid state is called _____
27. Any place or location through which water can be obtained is a _____
28. Lack of food over a long period of time is called _____
29. An economic activity, that involves keeping of animals and growing of crops is called _____
30. Activities which are carried out by people or machines on certain resources in order to create wealth are called _____

SECTION C: TRUE OR FALSE QUESTIONS

Write TRUE for the statements that are correct and FALSE for those that are wrong

31. A bar scale is also a linear scale _____
32. A statement scale can be converted in to a representative fraction scale or linear scale _____
33. If a scale of a map is 1cm represents 2km and two points are measured on that map and found to be 7cm. apart, then the actual distance of those points is 14km _____
34. The Arctic circle is $66\frac{1}{2}^{\circ}$ s _____
35. The equator is the longest latitudinal line that divides the earth into two halves namely Eastern and Western hemispheres _____

36. A word that is used to describe any object relating to the sun or that uses sun's light and energy is solar _____
37. The arrangement of planets and other heavenly bodies that are controlled by the gravity of the sun is solar system _____
38. The study of the heavenly bodies including the solar system is known as astrology _____
39. The solar eclipse occurs when the earth is between the sun and the earth _____
40. The crop that originated from Indonesia and is grown largely in Zanzibar is cloves _____

SECTION C: MATCHING QUESTIONS

Match the following items accordingly

<p>41. Weather 42. Mining 43. Goods 44. Thermometer 45. Global warming 46. Precipitation 47. Geita 48. Eruption of magma 49. Never cross one another 50. Ratio</p>	<p>A. Extracting minerals from the ground B. The persistence increase of the atmospheric temperature C. Ready-made materials to be consumed D. Day to day state of the atmosphere E. An instrument used to measure wind F. Dew G. An instrument used to measure temperature of an object or place H. Commodities or goods for an industry I. Rainfall J. Diamond K. Volcanic mountain L. Gold M. Contour lines N. Scale of map O. A way of expressing scale of a map</p>
